

# THE REVOLUTION OF VOICE LOGGING TECHNOLOGY

- DTMF and FSK
- 1-Line/2-Line USB
- Voltage /Audio/Key control

## All-in-one Design

The all new USB series multi-channel recording system is an all-around telephone recording system. System is connected with the PC via a USB line. Each record is stored in the PC hard disk.

## Multi-channel Recording

One computer can connect 4 USB recording box

## Data Management

Recording sys can print out, statistic and analysis for dialing in, dialing out and incoming call data. Also can transfer GSM recording data to MP3 and WAV format.

## Digital Recording

Fully digital mode for record and playback, hi-fi reappearance of the original sound. 1G hard disk space can contain recording data for 70 hours.

## High Quality Audio Circuit Design

USB series provide high quality recording sound with low noise, low attenuation, high-sensitivity circuit.

## Automatic Recording

Audio control(A), Voltage control(V) and Key control(K) are available. Dialing in and dialing out phone can be recorded automatically.

## Number Showing (caller id display)

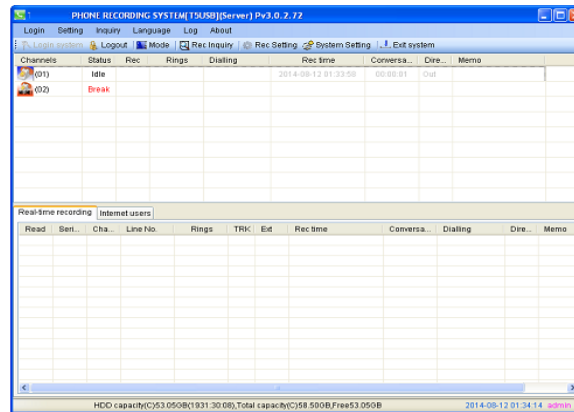

Telephone number "DTMF" and "FSK" mode can be showed and recorded correctly.

## Time Setting

Set starting and stopping record time as you wish during 24 hours.

## Main Interface

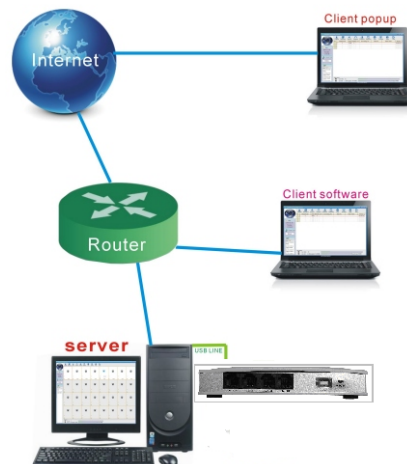

## Client Management

Recording sys can input and modify customer information through server. Pop up client information can be through local PC and network automatically according to incoming call number.

## Multi-Level User Accounts

It allows the administrator to add a new user, to delete a user, to configure user various operation authorizations.

## Monitor

Any channel telephone can be monitored in real time through local computer and network.

## Safe and Reliable

Password management and classified customer right make recording data safer and more reliable. Any recording won't be missed.

## Cycling Record

Cycling record according to designated record space and automatic deletion of the earliest record in batches.

## Quick Search

Recording can be searched and printed quickly according to channel number, call date and company name. Data can be played through audio card or recording card.

## Record Mode

There are three record modes of the system for you to choose from: Auto, Voice and Manual control.

**Auto voltage control:** record according to voltage change, ie. Start when telephone is picked up while finish when telephone is hung up.

**Voice voice control:** record based on whether there is sound signal in the line check, such as interphone and so on.

**Manual Phone keystroke control:** start and finish the record according to the content of the call by the caller through keystroke.

## Alarm Function

key operation, machine and fault with alert and warning.

## Parallel Operation

Record, call record, search and playback in the same time.
